17.   (Cancelled).

18.   (Cancelled).

19.   (Previously presented) A method performed by a computer system, comprising:

storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the second location is external to the paper, and wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference at the first location, wherein the second location is a file external to the paper, wherein the file includes audio signal information, and wherein the hyperlink is selectable at the first location by a user to cause an operation associated with the second location; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable at the first location by the user to cause the operation associated with the second location, wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location by the user.

20.   (Currently amended) A method performed by a computer system, comprising:

storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the second location is external to the paper, and wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference at the first location, wherein the second location is a file external to the paper script, wherein the file includes video image information, and wherein the hyperlink is selectable at the first location by a user to cause an operation associated with the second location; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable at the first location by the user to cause the operation associated with the second location, wherein the operation includes displaying video images on the display device executing the script in response to the video image information and a selection of the first location by the user.

21.   (Cancelled).

22.   (Cancelled).

23.   (Cancelled).

24.   (Previously presented) A system, comprising:

a computing device for:

      storing a version of a paper, the version being displayable on a display device as a

            likeness of the paper;

      at a first location within the version, detecting a reference to a second location,

            wherein the second location is external to the paper, and wherein the

            detected reference is at least one of the following, other than a computer

            network address: an alphanumeric character; a symbol; a term; and a

            phrase;

      in response to the detected reference, embedding a hyperlink within the detected

            reference at the first location, wherein the second location is a file external

            to the paper, wherein the file includes audio signal information, and wherein

            the hyperlink is selectable at the first location by a user to cause an

            operation associated with the second location; and

      while the first location is displayed on the display device, highlighting the first

            location to indicate the hyperlink as being selectable at the first location by

            the user to cause the operation associated with the second location, wherein

            the operation includes outputting audio signals in response to the audio

            signal information and a selection of the first location by the user.

25.   (Currently amended) A system, comprising:

a computing device for:

      storing a version of a paper, the version being displayable on a display device as a

          likeness of the paper;

      at a first location within the version, detecting a reference to a second location,

          wherein the second location is external to the paper, and wherein the

          detected reference is at least one of the following, other than a computer

          network address: an alphanumeric character; a symbol; a term; and a

          phrase;

      in response to the detected reference, embedding a hyperlink within the detected

          reference at the first location, wherein the second location is a file external

          to the paper ~~script~~, wherein the file includes video image information. and

          wherein the hyperlink is selectable at the first location by a user to cause an

          operation associated with the second location; and

      while the first location is displayed on the display device, highlighting the first

          location to indicate the hyperlink as being selectable at the first location by

          the user to cause the operation associated with the second location, wherein

          the operation includes displaying video images on the display device

          ~~executing the script~~ in response to the video image information and a

          selection of the first location by the user.

26.   (Cancelled).

27.   (Cancelled).

28.   (Cancelled).

29.   (Previously presented) A computer program product, comprising:

a computer program processable by a computer system for causing the computer system to:

   store a version of a paper, the version being displayable on a display device as a likeness of
      the paper;

   at a first location within the version, detect a reference to a second location, wherein the
      second location is external to the paper, and wherein the detected reference is at
      least one of the following, other than a computer network address: an
      alphanumeric character; a symbol; a term; and a phrase;

   in response to the detected reference, embed a hyperlink within the detected reference at
      the first location, wherein the second location is a file external to the paper, wherein
      the file includes audio signal information, and wherein the hyperlink is selectable at
      the first location by a user to cause an operation associated with the second
      location; and

   while the first location is displayed on the display device, highlight the first location to
      indicate the hyperlink as being selectable at the first location by the user to cause
      the operation associated with the second location, wherein the operation includes
      outputting audio signals in response to the audio signal information and a selection
      of the first location by the user; and

apparatus from which the computer program is accessible by the computer system.

30.   (Currently amended) A computer program product, comprising:

a computer program processable by a computer system for causing the computer system to:

> store a version of a paper, the version being displayable on a display device as a likeness of the paper;

> at a first location within the version, detect a reference to a second location, wherein the second location is external to the paper, and wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

> in response to the detected reference, embed a hyperlink within the detected reference at the first location, wherein the second location is a file external to the paper script, wherein the file includes video image information, and wherein the hyperlink is selectable at the first location by a user to cause an operation associated with the second location; and

> while the first location is displayed on the display device, highlight the first location to indicate the hyperlink as being selectable at the first location by the user to cause the operation associated with the second location, wherein the operation includes displaying video images on the display device executing the script in response to the video image information and a selection of the first location by the user; and

apparatus from which the computer program is accessible by the computer system.
